Summary of Timing systems

- More Event Timers are available for 2KHz even higher repetition:
  - A032-ET from Latvia, prec. 10ps, 10KHz
  - P-PET-C from Czech, prec. 2.5ps, 2KHz
  - T2L2 ET from OCA/France, prec. 2ps, ~2KHz
  - ET from HSTI/USA, prec. 2ps, ~50KHz

  - with better linearity and thermal drift.
  - Question: Are the prices for these ETs available?

- Y.Zhang from Shanghai Obs. Showed in a poster that only one chip of FPGA can work as a timer for future space applications or other compact systems.
