

ILRS ASC Summary

SC Chairs: Erricos C. Pavlis and Cinzia Luceri

ILRS ASC Meeting Summary

- Reports by the ACs/CCs on operational products (ESA & GFZ absent);
- The Station Systematic Error Monitoring PP completed the first phase with results from seven ACs (the only remaining AC to contribute is **GRGS**), next phase is reanalysis with new CoM model;
- New model for the CoM corrections was presented; expected delivery to the ACs: **next week** ;
- Schedule for an operational phase moved to next year, after the final reanalysis with the new CoM model (by the end of 2018);
- A preliminary schedule for the re-analysis for ITRF2020 and the model improvements were discussed;
- PPs for low-degree harmonic estimation and the incorporation of LARES in the operational data product, as well as the modeling of loading corrections for stations and the orbit at observational-level to be discussed at the EGU;
- Status report on the Special Issue on Laser Ranging in the Journal of Geodesy
